OPTION 4: ALTERNATIVE BENEFIT

The Bay Area Commuter Benefits Program includes a provision for employers to propose an alternative commuter benefit (Option 4). This alternative option may be especially relevant for employers whose work sites are not well served by transit. This guide is intended to assist employers in developing and implementing an alternative commuter benefit pursuant to Option 4. The guide contains information on alternative benefit options, as well as information on how an employer can submit its own alternative option, and the process for reviewing employer-proposed alternative options.

Alternative commuter benefits must be as effective as the three basic options (i.e., Options 1, Option 2, and Option 3) in reducing single-occupant vehicle trips to the work site (or equivalent emission reductions). This guide describes three approaches to Option 4. Option 4A and Option 4B are intended to help employers develop alternative programs by choosing from a menu of potential measures. If an employer selects measures from the menu that meet the criteria for Option 4A or Option 4B, then the employer's alternative commuter benefit will be treated as "pre-approved."

Employers also have the flexibility to submit their own unique commuter benefit proposal via Option 4C. In the case of Option 4C, the Air District would need to review the proposed alternative benefit and determine that it would be as effective as the basic options.

TABLE OF CONTENTS

“Pre-Approved” Alternative Commuter Benefit Options	1
Primary Measures	1
Carpool Subsidy.....	1
Bicycle Subsidy.....	2
Telework Program.....	2
Compressed Workweek Schedule.....	2
Plug-in Electric Vehicle Implementation.....	2
Parking Cash-Out.....	3

“PRE-APPROVED” ALTERNATIVE COMMUTER BENEFIT OPTIONS

To help employers select an effective alternative benefit, and to streamline the review process, Air District and MTC staff have identified two ways that employers can develop a “pre-approved” alternative commuter benefit program: Option 4A and Option 4B. The pre-approved options are intended to give employers flexibility in designing an alternative commuter benefits program appropriate for their worksite, while providing clarity as to how meet the criteria for a pre-approved program.

If an employer proposes to offer an alternative commuter benefits program that conforms to the criteria for Option 4A or Option 4B described below, the proposal will comply with Program requirements.

Option 4A: Employer selects **one primary plus at least two secondary (or primary) measures** from the table below.

Option 4B: Employer selects at least **four secondary (or primary) measures** from the table below.

Primary Measures	Secondary Measures
<input type="checkbox"/> Carpool Subsidy (\$3/day that employee carpools) <input type="checkbox"/> Bicycle Subsidy (\$20/month) <input type="checkbox"/> Telework Program <input type="checkbox"/> Compressed Workweek <input type="checkbox"/> Electric Vehicle Implementation (fleet changeover, EV car share for employees, charging stations, etc.) <input type="checkbox"/> Parking Cash-Out (for employer’s who are subject to California’s statewide Parking Cash-Out law or if the employer opts to offer Parking Cash-Out even if it is not subject to the law).	<input type="checkbox"/> Preferred parking for carpools <input type="checkbox"/> Provide an employer-specific carpool match service <input type="checkbox"/> Employer-provided membership in a car-sharing program <input type="checkbox"/> Participation in an emergency/guaranteed ride home program <input type="checkbox"/> Secure, on-site bicycle parking <input type="checkbox"/> Showers and lockers for employees who bike or walk <input type="checkbox"/> Employer-sponsored Bike Share Program <input type="checkbox"/> Employee commuting awards program (ex: bonus vacation day, free lunch, gift card, etc.) <input type="checkbox"/> On-site amenity (ATM, café, catered lunch, on-site childcare, dry cleaning, etc.) <input type="checkbox"/> Provision of a shared mechanism for viewing real time commuting info (ex: flat screen monitor in lobby) <input type="checkbox"/> Lunchtime shuttle <input type="checkbox"/> Transit Subsidy (at least \$1/day but less than \$3/day)

For examples of pre-approved alternative benefit options consistent with the parameters described above, see the following links:

- [Option 4A: Carpool Subsidy](#)
- [Option 4B: Carpool Promotion](#)
- [Option 4A: Bicycle Subsidy](#)

PRIMARY MEASURES

See below for detailed guidance on each of the primary measures for Options 4A and 4B.

Carpool Subsidy¹

Many worksites throughout the Bay Area are not well served by transit or vanpool, and therefore carpooling may be a more viable option for a wide range of worksite sizes and geographic settings. The federal tax code does not allow wages used for carpool costs, or employer-provided carpool subsidies, to be excluded from the employee’s taxable income. However, carpooling is a popular option among employees and is an effective means of reducing drive-alone commute trips. Employers that choose to offer a carpool subsidy (\$3 per day that an employee carpools) as a primary measure for Option 4A are encouraged to

¹ The Program does not define the term “carpool.” For the purpose of providing benefits for carpooling, the employer has the discretion to define a carpool as including either two or more vehicle occupants, or three or more vehicle occupants.

offer secondary options that will complement the carpool subsidy, such as preferred parking for carpoolers. For an example, see [Option 4A: Carpool Subsidy](#).

Bicycle Subsidy

IRS Code section 132(f) does not allow employees to use pre-tax dollars to pay for bicycle commuting expenses. However, it does allow employers to provide a tax-free subsidy of up to \$20 per employee per month (\$240 per year) to offset an employee's bicycle commuting expenses (including the purchase of a bicycle, bicycle maintenance, and bicycle parking). An employer-provided bicycle subsidy up to \$20 per employee per month (\$240 per year) is treated as tax-free to the employer, but not the employee. Note: An employer may choose to provide a higher subsidy for bicycle commuters, but the amount above \$20 per month would be treated as taxable income to the employee. For the purpose of the Program, a bicycle subsidy can be provided in conjunction with a transit/vanpool subsidy pursuant to Option 2, or as a primary measure pursuant to Option 4. For detailed information on qualifying bicycle expenses, see [IRS documentation](#). For more detailed guidance on how to set up and offer a pre-tax subsidy for bicycling expenses, see [Option 2 on page 6 of the Employer Guide](#).

Telework Program

Teleworking, also known as telecommuting, replaces travel to and from the worksite with telecommunications technologies. In addition to saving time and money for employees, teleworking can be an effective strategy for reducing drive-alone trips to and from the worksite. Teleworking is also known as a perk that many employees view as very valuable, which can help employers attract and retain the best employment talent and improve employee productivity.

Implementation and Recordkeeping: For the purpose of administering a telework program, the Air District and MTC recommend that an employer implement a [company-wide telework policy](#), and suggest that employees who participate in teleworking do so at least once per week on

a regular basis.

Employers who provide a telework program by means of Option 4A should maintain records to document the implementation of teleworking in order to comply with the record-keeping requirement of the overall Program.

Additional Telework Guidance: [Frequently Asked Questions](#), and other guidance including a [telework program implementation guide](#), a [telework selection survey for employees](#), an [OSHA memo](#), and [more](#).

Compressed Workweek Schedule

The term "compressed work week" (CWW) describes a schedule whereby an employee works a full-time schedule in fewer days than a normal five-day week. The most common versions of a CWW schedule include a 4/10 (four days per week of 10 hour shifts) and a 9/80 (eight nine-hour shifts plus one eight-hour shift for every two week period). Compressed work weeks can be an effective strategy for reducing drive-alone commute trips. Employees who compress their work week make fewer commute trips, and they may also be able to avoid the peak commute time each day by arriving early and/or staying late. Benefits to employers may include extended hours of customer service and production.

Implementation and Recordkeeping: For the purpose of administering a compressed work week (CWW) schedule, the Air District and MTC recommend that an employer implement a [company-wide CWW policy](#), and suggest that employees who participate in a CWW use a 9/80 or 4/10 schedule. Employers who implement a CWW schedule by means of Option 4A should maintain records to document the implementation of the schedule in order to comply with the record-keeping requirement of the overall Program.

Plug-in Electric Vehicle Implementation

Plug-in electric vehicles (PEVs) significantly reduce tailpipe emissions of air pollutants and greenhouse gases. PEVs are therefore considered a viable alternative for the purpose of

Option 4, even though they do not directly reduce vehicle trips. Examples of electric vehicle implementation programs that may qualify for the purpose of complying with the Program by means of Option 4 include the installation of EV charging stations that are available for employees who drive PEVs, use of PEVs in the employer's vehicle fleet, PEV car-sharing for employees, and more.

See below for recommended EV programs:

Plug-In Charging Stations: Widespread adoption of PEVs requires more than just new vehicles, it also requires the creation of new infrastructure. Installing charging stations at the worksite(s) and providing employees access to those stations will provide an additional incentive to employees considering a PEV. For information on the different types of charging stations, and where and how to purchase one, see the [Bay Area PEV Ready website](#) and the report [“Electrify Your Business: Moving Forward with Electric Vehicles, A Business Guide.”](#)

Fleet Changeover: Businesses that switch their fleet from gas-powered to electric will yield immediate emissions reductions of air pollutants and greenhouse gases. There may be economic benefits from switching to electric vehicles as well. According to a study by the Bay Area Council, operating costs for electric vehicles are much lower than for gasoline or diesel-powered vehicles, and the total cost of maintenance and insurance may also be less for PEVs. For more information on transitioning your company fleet from internal combustion to electric, see the report [“Electrify Your Business: Moving Forward with Electric Vehicles, A Business Guide.”](#)

PEV car-sharing: An employer-provided car-sharing program facilitates the use of alternative commute modes (e.g., ride-sharing, transit, bicycling or walking) because employees will have access to a vehicle should they need one. Employees who participate in car-sharing may be able to use the vehicle for personal use (such as for lunch or errands during lunch), for emergencies (such as a sick child) or for business use (where the

employee may otherwise be required to use their own person vehicle). A car-sharing program comprised of PEVs will provide greater emission reductions. Employers could further complement this measure by providing preferential parking for the car-sharing service. For additional information on car-sharing, including potential benefits and car-sharing operations, visit [UC-Berkeley's Transportation Sustainability Research Center](#).

Parking Cash-Out

State law requires certain employers who provide subsidized parking for their employees to offer employees the option of taking a cash allowance in lieu of a parking space. This law is called the [parking cash-out program](#). The intent of the law is to reduce vehicle commute trips and emissions by offering employees the option of “cashing out” their subsidized parking space and taking transit, biking, walking or carpooling to work. For more information on the parking cash-out law, including whether an employer must implement a parking cash-out program, visit the [California Air Resources Board's website](#).

Studies have shown that parking cash-out (PCO) programs can be very effective in promoting the use of alternative commute modes. Parking cash-out programs may also result in savings from reduced parking costs, and employers could benefit financially from selling or leasing excess parking land, or use the space for a new building, equipment storage or green space.

Employers can comply with the Program by means of Option 4A by implementing a PCO policy in combination with at least two [secondary measures](#).

Additional information, including [case studies](#) is available.

SECONDARY MEASURES

Information related to secondary measures for Options 4A and 4B is provided below.

Carpool Subsidy

Many worksites throughout the Bay Area are not well served by transit or vanpool, and therefore carpooling may be a more viable option for a wide range of worksite sizes and geographic settings. The federal tax code does not allow wages used for carpool costs, or employer-provided carpool subsidies, to be excluded from the employee's taxable income. However, carpooling is a popular option among employees and is an effective means of reducing drive-alone commute trips. Employers may choose to offer a carpool subsidy of at least \$1 per day (but less than \$3/day) for each day that an employee carpools to work as a secondary measure for the purposes of complying via Option 4B. Employers who offer this measure are encouraged to provide additional secondary measures options that will complement the carpool subsidy, including preferred parking for carpoolers, an employer-specific carpool match service, and participation in a guaranteed ride home program.

Tracking and Recordkeeping: Employers who provide a carpool subsidy as a secondary measure for complying with the Program by means of Option 4B should maintain records to document the transit subsidy in order to comply with the record-keeping requirement of the Program.

Bicycle Parking

Bicycle parking, storage and shower/changing facilities are important strategies for providing convenience and security for bicyclists at their place of employment. Major deterrents to bicycle transportation are inadequate facilities and fear of theft. Secure bicycle parking includes a properly designed bicycle rack in an appropriate (and safe) location. Alternatively, employers may allow employees to bring their bicycles into their offices or work stations. Things to consider when implementing bicycle parking/storage and/or shower facilities:

- **Parking:** Consider offering short-term and long-term bicycle parking. Short-term parking requires a high degree of convenience (close to destination), and should be protected from the weather to the extent feasible. Long-term parking requires a high degree of security and weather protection. Complementary items include nearby lockers, and/or storage rooms.
- **Visibility:** Bicycle racks should be visible to deter theft and vandalism.
- **Security:** Include adequate lighting and surveillance, and perhaps fencing. Bicycle racks or lockers should be well anchored to the ground.
- **Weather Protection:** Use an existing overhang or covered walkway, a special covering, or an indoor storage area.
- **Adequate space/clearance:** Give cyclists enough room to maneuver.

Detailed suggestions for selecting and [locating bicycle parking and storage facilities](#) and bicycle rack vendors are available.

Showers and/or Lockers for Employees who Bicycle/Walk

Providing employees with a place to shower, change, and/or store clothes can encourage bicycling or walking to work. As a co-benefit, these types of facilities can also benefit employees who exercise before work or during breaks. Strategies for including shower/change facilities include:

- Showers and lockers installed in new or retrofitted buildings;
- Showers and lockers can sometimes be added to existing restrooms. A single shower stall and space to change typically requires a 6 foot by 4 foot space.
- Several businesses located close together, or as part of a TMA, could establish a shared shower/change facility with lockers.
- Employers could arrange for employees to be able to access shower/change facilities and lockers at a nearby fitness center (the hours of operation should be taken into consideration).

Employer-Sponsored Bike-Share Program

Employer-sponsored bike sharing is an incentive to encourage ridesharing, taking transit, or walking to work. A bike-sharing program is typically designed to provide convenient loaner bicycles intended for short trips, including to business-related meetings or functions. Employers could simply purchase bicycles/helmets and provide them to employees free of charge. Employers could also participate in a corporate partnership program with a public bike-sharing program (such as [Ford GoBike](#)).

Preferred Parking for Carpools & Vanpools

Preferred parking can be an incentive to encourage carpooling, and parking spaces can be designated for individual carpools or ride-sharers in general on a first-come, first-served basis. To be effective, designated spaces should be provided in the most desirable location(s): near the building entrance(s), covered, and/or attended. Even employees with abundant parking options will enjoy parking closer to the building. At worksites where parking supply is less than demand, the effectiveness of preferred carpool parking will be even greater.

Employer-Specific Carpool Match Service

511 can help you develop a customized and comprehensive worksite transportation program, including ridematching for carpool and vanpool programs. Co-workers can be instantly matched with carpool partners making the same drive with 511's RideMatch Service. And, 511 can help companies start vanpools that help employees save money and help employers reduce greenhouse gasses and reduce parking needs. There are other unique and free commercial applications offering products and services such as employer-specific carpool match service. Please go to: 511.org and click on Getting Around, Third-Party Apps & Websites or go directly [here](#) for more information. A list of these other commute solutions is also available on the [Benefit Providers List](#).

Employer-Provided Membership in a Car-Sharing Service

Employer-provided membership with car-sharing service (such as [Zipcar](#), [Carma](#), [GigCarshare](#), [Enterprise](#)

[CarShare](#), [GetAround](#)) facilitates ridesharing, taking transit, bicycling or walking to work because employees will have access to a vehicle should they need one. Employees who participate in car-sharing may be able to use the vehicle for personal use (such as for lunch or errands during lunch), for emergencies (such as a sick child), or for business use (where the employee may otherwise be required to use their own personal vehicle). Employers could further complement this measure by providing preferential parking for the car-sharing service.

For additional information on car-sharing, including potential benefits and car-sharing operations, visit [UC-Berkeley's Transportation Sustainability Research Center](#).

Guaranteed Ride Home (Emergency Ride Home)

Guaranteed ride home (GRH) programs, also known as emergency ride home (ERH), provide an occasional [subsidized](#) ride to commuters who use alternative modes, such as ridesharing, bicycling or taking transit. For example, if a bus rider must return home for an emergency, or a carpooler must stay at work later than expected, the guaranteed ride home program will provide them with a subsidized taxi, company vehicle or rental car ride home (or to their child's school if need be, etc.).

There are many GRH programs throughout the Bay Area; see <http://511.org/carpool-vanpool/benefits/county> for more details. Employers in counties not offering a GRH/ERH program can get help from 511 Rideshare to set up their own GRH service (with local taxi or other transportation providers). Requirement: To use GRH as an element of an alternative commuter benefit for the purpose of complying with the Program by means of Option 4, employers must participate via a county program that offers one or adopt a company-wide GRH policy for all Bay Area worksites.

Employee Commuting Awards Program

Employee commuting awards are an informal strategy for incentivizing employees to commute via ridesharing, transit, bicycling or walking. Commuting awards may also increase employee morale and mood. The type or value of the commute award is up to the discretion of the employer.

Suggestions include gift certificates, bonus vacation day, tickets to sporting events, etc. How a winner is selected is also up to the discretion of the employer. Commuting Awards should be provided on a regular basis, ideally on a monthly or quarterly basis. Guidance for [offering and implementing an employee commuting awards program](#) is available.

On-site Amenity

Providing employees with an on-site amenity such as on-site childcare, restaurants or shops reduces the need to drive for errands and acts as a complement to other types of incentives for ridesharing, taking transit, bicycling or walking. The type of on-site amenity provided is up to the discretion of the employer.

Provision of a Shared Mechanism for Viewing Real-Time Commuting Information

Screens which display real-time transportation information encourage commuters to use alternative modes. [511 Transit Tracker](#) is a free web-based app that allows employers to build a custom page to display nearby real-time bus and train departure times for a number of Bay Area transit agencies including BART, MUNI, AC Transit, Dumbarton Express, SamTrans, VTA, WestCAT, and Caltrain. Once a display is created, it can be viewed on a smart phone, tablet, desktop computer, and web-enabled kiosk or television. This allows employees to quickly and easily see what type of transportation is available and nearby, and when it will depart. The goal is for employees to consider all their travel options and re-consider driving alone. Screens should be placed in high-trafficked areas or made available to all employees. There are other unique and free commercial applications offering products and services such as real time transit information. Please go to: [511.org](#), click on Getting Around, Third-Party Apps & Websites or go directly [here](#) for more information. A list of these other commute solutions is also available on the [Benefit Providers List](#).

Lunchtime Shuttle

Providing employees with a mid-day shuttle to shopping and dining options near the worksite reduces the need for employees to drive to work. The concept is similar to that of providing on-site amenities. The lunchtime shuttle should be provided to employees for a low cost (as defined in Option 2) or for free. The details of the shuttle service are at the discretion of the employer.

EMPLOYER-PROPOSED ALTERNATIVE BENEFIT (OPTION 4C)

In addition to the “pre-approved” ways to comply with the Bay Area Commuter Benefits Program via Option 4 described above, the Program also allows employers to propose their own alternative commuter benefit. This is known as Option 4C.

To propose an alternative benefit, employers should complete the online registration form and select Option 4C. The registration form requires the employer to provide a brief description of their proposed alternative commuter benefit, and to explain why the proposed alternative would be appropriate and effective in reducing vehicle trips (or vehicle emissions) to the worksite(s).

For purposes of Option 4C, an employer-proposed alternative must be as effective as Options 1, 2 or 3 in reducing drive-alone commute trips (or vehicle emissions). Air District staff will review the employer’s proposal, and may contact the employer for additional information. Air

District staff will notify the employer within 30 days as to whether the employer’s proposed alternative has been approved.

Evaluation Criteria for Option 4C

The basic criteria that Air District staff will use to review and evaluate employer-proposed alternative commuter benefits pursuant to Option 4C are as follows:

1. The proposed alternative commuter benefit must be as effective in reducing drive-alone commuter trips as any of the three basic options (i.e., Options 1, 2, or 3).
2. Alternatives should achieve direct reductions in vehicle trips and/or vehicle emissions.
3. There should be a mechanism to verify the results or document the effectiveness of the alternative commuter benefit.

APPENDICES

Carpool Subsidy Option

The employer would offer one primary benefit and two secondary benefits focused on carpooling:

- Carpool Subsidy (\$3/day that employee carpools)
- Preferred parking for carpools

Plus one additional Secondary Measure of the employer's choice.

Carpool Promotion Option

The employer would offer four (4) secondary benefits focused on carpooling (in addition to actively participating in 511.org Employer Program):

- Preferred parking for carpools
- Participation in an emergency/guaranteed ride home program

Plus 2 additional Secondary Measures of the employer's choice.

Bicycle Option

The employer would offer one primary benefit and two secondary benefits focused on bicycling (in addition to actively participating in 511.org Employer Program):

- Bicycle Subsidy (\$20/month)
- Secure, on-site bicycle parking

Plus at least one additional Secondary Measure of the employer's choice.

Telework Model Policy

This model policy is intended to act as a guideline and framework for employers choosing to adopt a telework program. Employers should modify and edit this document to reflect their company and company policies.

Purpose

The Telework Policy supports teleworking as a strategy to:

- Provide workplace flexibility and job satisfaction for staff whose responsibilities are suitable for telework.
- Recruit and retain staff who may not live in close proximity to the worksite.
- Increase productivity and reduce possible burnout by providing alternative work environments to perform functions requiring extensive reading, writing, analysis or other intensive desk focused work.
- Reduce greenhouse gas emissions resulting from various means of commuting to work.
- Institutionalize a culture of managing to productivity.
- Comply with the Bay Area Commuter Benefits Program.

Teleworking is not appropriate for all positions within the company and will depend on individual job functions.

Policy

Telework is currently available for staff performing the following functions:____. Telework is not suitable for positions that require physical presence to perform effectively, where necessary equipment cannot be easily accessed remotely, or for employees who require close supervision.

Teleworking on a regular or short-term basis requires completion of the Telework Agreement by the employee and _____. Telework for one day and/or a temporary arrangement requires verbal or written approval.

All telework agreements are for a maximum of 12 months with an initial probationary period of 3 months. After which time the agreement will be reviewed and a new agreement established by the employee, and _____.

Employees and supervisors must agree on a standard telework schedule. If this changes, the Telework Agreement must be updated to reflect the new schedule.

The Telework Agreement is only approved between the employee and the _____ signing the agreement.

Employees may use their own equipment including cell phones, computers or other equipment, at their own risk and cost.

Guidelines

Telework may be approved for employees taking into consideration the following:

- Telework is feasible based on the type of work the employee is expected to perform.
- The employee has successfully completed his/her probationary hiring period.
- The employee has demonstrated sustained high performance as determined by his/her supervisor and documented in a recent performance evaluation.
- The supervisor believes that the employee is able to maintain the expected quantity and quality of work while teleworking.
- The teleworking arrangement does not place any added workload on other staff.

The employee will:

Be available for telephone calls and emails.

- Be available to attend worksite or off-site meetings without any inconvenience to other staff or stakeholders.
- Check email and respond in a timely manner.
- Check voicemail messages regularly and return calls in a timely manner.
- Maintain an up to date calendar.

The supervisor will:

- Establish and communicate clear telework performance expectations and develop a plan and timetable for monitoring the effectiveness of the telework arrangement.
- Communicate issues if and when they arise, and work with the employee to resolve them.
- Work creatively to maintain a collaborative team environment across the company to support a growing telework environment and ensure consistent and equitable treatment.
- Work to ensure teleworking does not serve as a barrier to professional development opportunities.
- Work to address technological, logistical, organizational and cultural telework barriers.

Compressed Work Week Model Policy

This model policy is intended to act as a guideline and framework for employers choosing to adopt a Compressed Work Week schedule. Employers should modify and edit this document to reflect their company and company policies.

Purpose

The Compressed Work Week (CWW) Policy supports alternative schedules as a strategy to:

- Provide workplace flexibility and job satisfaction for staff whose responsibilities are suitable for compressed work week schedules.
- Recruit and retain staff that may not live in close proximity to the worksite(s).
- Increase productivity and reduce possible burnout by providing alternative work schedules.
- Reduce greenhouse gas emissions resulting from reduced means of commuting to work.
- Comply with the Bay Area Commuter Benefits Program.

CWW schedules may not be appropriate for all positions and will depend on individual job functions.

Policy

CWW schedules are currently available for staff performing the following functions _____. CWW schedules are not suitable for all positions/functions.

Participating in a CWW schedule on a regular or short-term basis requires completion of the Compressed Work Week Agreement by the employee and _____. CWW as a temporary arrangement requires a verbal or written approval from _____.

All CWW agreements are for a maximum of 12 months with an initial probationary period of 3 months. After which time the agreement will be reviewed and a new agreement established by the employee, supervisor, and _____.

Employees and supervisors must agree on a CWW schedule. If this changes, the Compressed Work Week Agreement must be updated to reflect the new schedule.

The Compressed Work Week Agreement is only approved between the employee and the _____ signing the agreement. If the employee changes positions or is assigned to a new supervisor, a new agreement will need to be decided upon between the employee and _____.

Guidelines

CWW schedules may be approved for employees taking into consideration the following:

- A CWW schedule is feasible based on the type of work the employee is expected to perform.
- The employee has successfully completed his/her probationary hiring period (if applicable).
- The supervisor believes that the employee is able to maintain the expected quantity and quality of work while on a CWW schedule.
- The CWW arrangement does not place any added workload on other staff.

Guaranteed Ride Home Model Policy

This model policy is intended to act as a guideline and framework for employer's choosing to adopt a Guaranteed Ride Home Policy. Employers should modify and edit this document to reflect their company and company policies.

Purpose

The Guaranteed Ride Home (GRH) Policy is a supporting strategy to:

- Promote the use of alternative commute modes to/from the worksite.
- Provide workplace flexibility and job satisfaction.
- Reduce greenhouse gas emissions resulting from various means of commuting to work.
- Comply with the Bay Area Commuter Benefits Program.

Policy

Employee Eligibility: GRH is currently available to all eligible employees. Eligible employees include_____.

Trip Eligibility: *The program could cover any trip, or it could be limited to unexpected business appointments, employee or family member sickness, etc.*

The maximum number of uses allowed during a _____ (month, quarter, year) is _____, or the maximum cost per _____(month, quarter, year) is_____, whichever is less.

Implementation: _____ staff is responsible for implementing the GRH program.

Appropriate forms: *Voucher system; pre-paid debit/credit cards; company credit cards; cash reimbursement.*

Procedures for using the GRH service: *insert what transportation provider employees should use, state whether it will be a voucher system or cash system with reimbursement, and who will track the GRH use, etc.*

No Endorsement of Third Party Websites, Products, or Services

The websites currently accessible at 511.org, m.511.org, and 511SFBay.org (collectively "Sites") are owned and operated by the Metropolitan Transportation Commission ("we", "our," or "us"). The Sites or the Services may contain or feature references (including without limitation advertisements, hypertext or other links to other websites or applications) that are not owned, operated, controlled or reviewed by us. These references and links are provided solely as a courtesy and convenience to you and do not constitute sponsorship, endorsement, or recommendation by us or other affiliation with us. We specifically disclaim any and all liability from damages that may result from the accessing or use of any third-party websites or third-party software applications.
